TENTH FORTNIGHTLY GOVT. CROP REPORT

Issued By the Department of Agriculture.

EDMONTON—Threshing is fully seventy-five per cent completed throughout the province and the progress is being made on the remaining, according to telegraphic reports received by the Department of Agriculture for the tenth fortnightly crop report of the season.

Weather conditions during the past few weeks have been generally favorable, although in a number of localities light falls of rain and snow have hampered operations to some extent. Grain is moving rapidly to elevators and at some country points elevators are reported to be filled to capacity.

Recent reports make it difficult to estimate with any degree of accuracy the damage resulting from frost. In a number of localities and in the case of earlier crops, the damage has been slight, while in other districts the quality of a considerable percentage of the grain threshed has been lowered from one to three grades, and a market decrease from the anticipated yield is reported.

In the case of the 1927 crop, the season has been very satisfactory, and grades on the average are stated to be better than for last year's crop. A

great deal of fall plowing has been done throughout the province, and this, along with the large amount of land newly broken during the past summer, indicates the province is in readiness for next season.

Good progress is being made with the harvest of the sugar beet crop in the southern part of the province, and very satisfactory yields are reported.

—

Coming Events

"Ramona", the gripping California story at Hirtle's Theatre on Friday and Saturday, October 12th and 13th.

Novelty Dance, Balloon Dance and Elimination Dances, heaps of fun. Strathmore Orchestra and Anglican Ladies Guild supper, on Halloween at the Big Tree Club Dance.

The Women's Institute will hold a regular meeting at the home of Mrs. Oliver Wright on Wednesday, October 17th.

The annual Masquerade Dance, under the auspices of the Nightingale U.F.W.A., will be held in Nightingale Hall, on Friday, November 9th.

New Income For Farmers Is Predicted

REGINA—Prediction that peat farmers of the future will reap an added crop from the sale of the threshing chaff they now burn, was made by Prof. Waldemar Kaempfer, of the American Institute of Chemistry, who was a visitor to Regina. His interest had been aroused by the spectacle of burning stacks of chaff in the prairies.

"A meeting of the prairie chemists was held at the Northwestern University, at Evanston, Ill., in the early part of the year," he said, "which Prof. O. H. Sweeney, of lowell University, scheduled some 5,000 known industrial products that could be chemically produced from farm waste, such as corn stalks, corn cobs, wheat straw, oat chaff, cotton seed hulls and peanut shells. These include well-known articles of commerce as flavoring, perfume, synthetic rubber, imitation ivory, amber tortoise shell, substitutes for leather, lacquers, celluloid, moving picture films, rayon silk and 'sniffy' which promises to take the place of wool, just as rayon has taken the place of silk."

Quite Possible

Pouted pointed to the Professor that J. P. Murray, former leading manufacturer of Toronto, had predicted that the chaff could be used to burn coal when operated in Bregia using straw for the basis of its raw material. Prof. Kaempfer said that this was quite reasonable and possible.

"One concession to the prairie," said, "would be to grow rayon straw, which is well suited out of bagasse (bagasse is the fibrous material left after the sugar is squeezed out of the sugar cane). Once upon a time bagasse was regarded as a minor waste product, but when burned up, a very large chemical industry in turning straw into rayon, illuminating gas, acetic acid, wood alcohol, xylene, oxalic acid, furfural,

plastics has become the main industry and sugar the by-product."

Paper Pulp

"In addition to the manufacture of wall board," he said, "it would be possible for wheat straw to be used for making a pulp similar to paper pulp, for the production of special paper, such as paper for money, which has been used for the production of carbon fuel distillates such as furfural, which can be used in automobiles."

Asked if his visit indicated commercial interest by any manufacturing concern in the realization of the Canadian waste farm products, the Professor disclaimed any such purpose. "I am merely travelling across Canada and keeping my eyes open," he said, adding, "Industries such as I have mentioned require large capital, abundance of raw material and convenient distribution. I am quite sure you have large quantities of raw material and no doubt you have good distribution facilities, such a commercial interest would not locate here."

It is quite possible that the technical experts or some of the plants that will come here will work on your waste products, like the chemists of the 'I. G. have done in Germany. It is conceivable that the chaff could be used to produce a high grade lacquer or automobile finish from the straw waste. There is almost no limit to the products of cellulose, from which clearates were supplied to the wounded during the war to alleviate their pain," said Prof. Kaempfer. "It would be illegal on Sunday," maintained Mr. Rankin, "but in this case it was sold as a drug."

The judgment in this case will be watched with great interest by the general public.

"The manufacture of rayon silk from wood pulp now totals over 100,000,000 yards a year, and it is possible to build up a very large chemical industry in turning straw into rayon, illuminating gas, acetic acid, wood alcohol, xylene, oxalic acid, furfural,

lime, formaldehyde and synthetic lumber. I have no doubt that the time is approaching when the farmers of your province will be able to find a market for the waste they now burn."

UNIQUE RELIGIOUS SERVICE AT THE CALGARY ARENA

FRED MCKENZIE DIED ON SUNDAY IN STRATHMORE

On Sunday, the death of Frederick McKenzie, of Cheadle, took place at the home of his son, Wilfrid McKenzie, on Sixth Street.

Deceased had only been ill a short time, having suffered from pneumonia from which his family hoped that he was on the way to recovery.

Services were stopped off to sleep as never awakened.

He was born in Michigan, and came to Canada when a young man, and remained to a Chetwynd district about twenty years ago, when he was one of the most esteemed citizens.

He is survived by his widow, Mrs. McKenzie, and Harry at Cheadle, and daughter, Mrs. Robbie, of Okotoks.

A brother, resident of Beresford, Manitoba, and a sister, Mrs. Elliott at Pipestone.

NAMAKA

Considering the short time in which the work was prepared, the pupils of the Namaka schools did very well in the recent Strathmore School Fair. There were entrants in fourteen classes, and out of these sixteen won prizes. Among the prize winners were: Alberta, Ruth Alberta, Irene, Fran, Helen, Jack, Dennis, Carter, Marie, Bader, Charlie Bremner, Ronale Sprague and Steve Grich. There were four entries from Miss Caloren's room and 28 from Miss Scher's room. The Namaka schools did not enter until last Spring.

At the last regular meeting, the C.G.L.T. girls opened their new year with a dedication ceremony. Their leader presented them with a pin emblematic of their organization.

Mrs. C. Edwards is the guest of her mother, Mrs. E. C. Watts.

SPORT NOTES

CANADIAN JOCKEY AMONG BEST OF THEM

VIC RIPLEY WILL WORK FOR BLACK HAWKS

— o —

One boy who is making good in the turf game eastward is Jockey Criddle mye, son of Mr. and Mrs. John Criddle mye, of Vancouver. He has been, and still is, riding for the Willis Sharpe Kilmer stable, where he is top rider.

Kilmer, the little rider indicated to his parents in a recent letter, is selling all of his stock but seven, and Criddle mye plans on taking a rest very soon.

He intends to go home for a visit, and then go to Fla. Juanas this winter, taking his father with him.

This youthful rider has been in important dough for better than two seasons. He draws more for exercising in the racing stakes than half a dozen riders in local tracks surround in several years.

He made serious money in Havana last winter and even more on the New York and other eastern tracks this year. He is ranked as one of the top riders in the game today.

Surely hasn't turned his young head. He is still in love with his toots and his home in Vancouver.

Not long ago, Charlie Kleming, a well-known turf man, said of Criddle mye:

"I'd sooner have him riding for me than in a side-saddle than some of these alleged jockeys strapped on."

Criddle mye rode at Calgary and was popular with the Strathmore followers of the ponies.

THE LINKS OF LIFE

If you can smile when, spite of perfect stance,
Your game smirches the other with
that...

The teed up winks at you all
askance,

Smile then, and you're a golfer in
the bad like Ernie Whiteside.

If you can keep your head when
breath goes...

You lefted shots into the blant-
rough,

And pay your forfeit with a genial
grunt.

You may walk with Whiteside
and may know

The joy of stepping out with those
in front;

If you keep cool when hookey's
aimed beat, like Ernie Whiteside's

shakes,

And your opponents hard upon your
tail;

Gets you up one and then hains
to cheat—

Your partner staggers to the edge
of the fall...

If you keep your nerve then you
will do like Ernie Whiteside.

If some off day you join the Foot-
leers...

And this is lost and divots fit
like hell,

While caddie holds his moun to hide
his cues,

Your brassie breaks and every
stick for sale;

You're not the last to have to play
the game like Ernie Whiteside's

If spite of this you go unper-
turbed,

For golf and golf are very much the
ard Your Home Paper.

\$25,000 OFFERED TO HEAVYWEIGHTS

— o —

WILKES-BARRE, Pa. — Tommy Loughran, light heavyweight champion, at the camp of Harvey's Lake, has accepted a challenge from

James Ayres offering him \$25,000 for a heavyweight bout there at the end of November.

No opponent was mentioned in the camp of Promoter Herdman, who said a letter is on the way to Ayres.

Joe Smith, Loughran's manager, said he believed the opponent

the Argentinian has in mind is Luis

Smith also declared that he and

Loughran are not averse to a match

between the light heavyweight champion

and Mickey Walker, middleweight

king, providing the champion's per-

centage and usual conditions are ac-

corded.

two years—has an excellent chance of being voted the most favorable player in the league. At the age of eighteen he was a star in the world's series between the Giants and Senators.

TRANS-CANADA TRAIN FINISHED FOR SEASON

The Trans-Canada Canadian Pacific train has been discontinued for the season.

The train was only late three times during the summer, and then only by a matter of minutes. A total of 280 trips in either direction each trip over a distance of 2,885 miles, had been completed when the last trains arrived respectively at Vancouver and Montreal.

In giving the service represented by

the Trans-Canada eight trains are travelling each day, due to the great distance in the continental run, and each day 3,056 men are employed running the trains in operation. During the transcontinental run the schedules are changed 19 times and the engines, locomotives, conductors and trainmen, 14 times.

Two complete sets of equipment, eight of which are always in operation, are necessary to provide the service. The train, which runs in each direction, consists of 12 dining, 12 dining-sleeping, 16 standard sleeping cars, 15 ten-compartment sleeping cars, and ten-compartment observation cars. Inclusive of the 19 changes of engines in a transcontinental run, the Trans-Canada trains made only 39 stops in the run of 2,885 miles, and during the season made a mileage of \$80,880.

WOULD BRING BRITONS OUT TO DOMINION

—

WINNIPEG—Immediate schemes to attract desirable Britons to Canada must be devised, else Canada's opportunity of obtaining British emigrants will be lost, states Sir George F. MacMunn, K.C., K.S.C.L., D.S.O., organizing director of the Canadian Council of Empire Settlement, when he spoke at a meeting with Canon W. Vernon on Thursday.

At present there is not much to attract Britons to migrate to Canada, especially the west, in the opinion of Sir George. There are more than a million men, and many women, too, who are not satisfied with their present prosperity and could be induced to migrate in some work on arrival, of Sir George said that he was evident to him that there has been much agitation in the west of Canada for immigrants of British birth, but there must be a workable plan to entice the desirable class to the country. If immediate advantage of the situation is not taken, the opportunity will be lost, for the inevitable clash between the two main classes of Britons will be manifested in other parts of the Empire, or they will have reached an age or physical and mental condition that will make them undesirable as future immigrants.

Sir George MacMunn has been organizing director of the Church of England Council of Empire Settlement for three years, since his retirement from the army. His military career was distinguished, having in the army, for many years, 1888, have taken him through service in India and Africa during the Boer war, and in the Great war.

First Visit To Canada

Mr. and Mrs. G. H. Patrick had their first visit to Canada, and

had a most pleasant time.

Mr. and Mrs. G. H. Patrick arrived in Canada on Saturday last, and

had a most pleasant evening at the home of Mr. and Mrs. A. A. Moore.

ROSEBUD

Just a little excitement was caused at J. C. Campbell's farm last Sunday when some of the threshing crew began fighting with pitchforks. The police had to be called, and took the guilty party away.

The Catholic Women's Club met at the home of Mrs. Cleary last Wednesday.

The Ladies Aid of the United Church met at Mrs. H. Summers' last Thursday. Aprons were cut out for the bazaar to be held in November.

The town and all available fire extinguishers rushed to the National Elevator Thursday afternoon when fire broke out in the top of the building. But after a strenuous few minutes it was put out.

Philip Comstock spent the week end at his home here.

Our telephone operator sent out an S.O.S. call to Sault Ste. Marie when word came from the wheat of a tractor burst part of the crop and a new grain separator belonging to J. Walker north of town. By the time some of the willing workers arrived, the fire

was under control. Much sympathy is extended Mr. Walker.

The Order of Eastern Star are planning a dance about the last of the month. All Masons and Eastern Star members and their families and friends are invited to attend and make this affair, the first of its kind, a big success.

Most of the threshing is completed around here, and the most favorable weather since 1924 has been enjoyed. Farmers, however, are very disatisfied in the grade of the grain. No 1 scarcely being heard of.

Mr. and Mrs. Andrew Archibald announced the engagement of their daughter, Mrs. Helen Archibald, to Mr. Roy Lorie, of New York City.

Archibald is on his way east to attend the wedding, which will take place in New York the early part of November. Mr. Archibald formerly was manager of the Crown Lumber Co. here before H. Summers.

Mr. and Mrs. W. E. Hyman have gone to their Calgary home for the winter.

Mr. G. Hansen lost about 1,600 bushels of wheat in the fire that burned Mr. Walker's grain and separator.

ROCKYFORD

Mr. R. Roberts, formerly Manager of the Canadian Bank of Commerce, Rockyford, now residing at South Pasadena, California, U.S.A., was a business visitor here last week.

The Ladies Aid are holding their next meeting on October 18th at Mrs. Emily Post's.

The United Ladies Aid are having their annual Pow Wow Supper on Friday, October 29th. Come and get a real meal. They're always good.

Mrs. Conn Bissette and daughter arrived here to take up their abode in Rockyford.

The Rockyford Ratepayers Association are putting on a dance on Friday night, October 12th, at Ted Forsey's home, in aid of the Red Cross. Come and start the dancing season right, and make the winter dances a success. There is also a big Masquerade Ball October 31st.

MUCH FARM WORK NOW BY MACHINES

CHICAGO.—The days before the stillness of the farm mean a sharp change; electric lights are switching on; an electric toaster starts toasting; and the working day begins on the "mechanical farm" where machinery is rapidly multiplying its share of the work.

Even the rooster has lost his job as the official announcer of daylight.

The chickens get up by automatic signal to start a long working day. An electrically wound switch in the famous house which also heats water for the housewife, turns on the lights on the poultry house, lights automatically. And to a hen a bright light is the equivalent of an alarm clock.

In the cow-horn, overhead bulbs have been replaced by incandescent lamps, enabling the cows to eat and the farmer to milk by artificial light. Moreover, a machine may do the milking, and va-um clippers keep the cows comfortable and clean.

Farm Pictures in New Field

From glowing in gasoline tractor in spring to harvester and threshing with the combine in fall, mechanical tools came in as a substitute for hired help.

Such a farmer is D. B. Welch who lives near Larner, Kan. Thirty-nine years ago he and his wife started out as pioneers on land that boasted no improvements save a ditching post. Today they are pioneering again, this time in the field of power and machinery.

Break of day does not mean tramp through the fields, but time to bring in buckets of water on their farm. Then open faucets. For breakfast the women take eggs, fruit and meat out of an automatic electric refrigerator and switch on an electric waffle iron.

After the meal they wash an electric clothes washer, then go to the cabinet and let it work for them. A power mangle further lightens the housework. Formerly it required half a day to do the ironing, now is a ready to put away in a little over an hour.

Then Men Can Work Earlier. When the ironing is done, the milk is ready to be separated electrically. Soon there will be an electric churn in the milk room.

Outside, the men, too, enjoy lighter work. The tractor has replaced the team to start their chores by artificial light if they choose, for an electric lamp to stop the windmill illuminates all the outbuildings. It is a beacon that may be seen for miles. Should they be after hay, then they dry and store it by electricity.

Mr. Welch sometimes "knocks off" a little time and goes to the basement to charge his own and friends' radio batteries from the refrigerator.

While the men are doing their work, the son may sharpen discs or drills in the blacksmith shop—electrically—or he may dump some grain in the electric feed grinder. While the grinder is working, he helps a salesman fill the 10,000-gallon gasoline tank in the garage.

From Labor to Refreshment

Darkness falls as the chug-chug of the tractors ceases. Lights are flashed on. In the big living room sounds the radio, and the wife may sit and knit. This is the home of a jolly man who landed in Larner 35 years ago with \$63 in his pocketbook.

Although his unpretentious home is not on a park-like plot, Mr. Welch, 50, recently added a "master farmer," generates enough electricity with a plant of his own to run the cream separator and his wife's vacuum cleaner, washing machine and iron. In addition to lighting the house and barn, and on hot days an electric fan runs, so the power days cool the McClure home.

A combine, which harvests wheat with the aid of two men instead of the old-fashioned "gang," is Mr. McClure's threshing. A wheat crop of 29 acres broad was handled in record time this year, taking just three quarters of an hour less than a day for the whole threshing process. He has numerous other mechanical aids.

The cultural results of labor-saving devices are seen in the McClure home. With time saved from drudgery, Mrs. McClure turned interior decorator and made over her home in the course of three months. In time to come to build a radio from blueprints and to catalog his library made up of the publications of agricultural experiment stations and the Federal Government.

Now, as an amateur astronomer, Mrs. McClure turned interior decorator and made over her home in the course of three months. In time to come to build a radio from blueprints and to catalog his library made up of the publications of agricultural experiment stations and the Federal Government.

A THOUGHT FOR THIS WEEK

How easy it is for one to derive
from being to diffuse pleasure
around him, and how truly is a
kind heart a fountain of glad,
ness making everything in its
vicinity freshen into smiles,
etc. — Irving.

SURELY WOODEN
HEADED CUSTOMS
DEPARTMENT REGULATIONS

The policy of the Customs Department, the Dominion Government, is to assist tourists in obtaining information to tourists surely satisfies someone or all of them placed under the classification of "woodheads". The regulations permit a tourist to bring in his car into Canada free of duty and remain for six months, which is a sound and reasonable control.

The tourist must not do any business of any character—simply be a joyrider. If by any possible chance he should bring in a car into Canada, a friend has no agents in Canada, so he should inadvertently or for any other reason made a friendly call he is forthwith liable to be called upon to pay duty; should he be a speculator and drop into any of the markets and say, "I am going to buy a car in the market, Mr. Official gets busy and makes him come across with a duty collectable on his car.

Such a case came up in Winnipeg recently and the Manitoba Press refers to the case as follows:

A man from a city in one of the states just south of the Manitoba border came to Winnipeg this summer as a tourist. Looking for this summer as the opportunity for the development of a business he had in mind. If it had been known to the Customs Department that he even had such a plan in mind, no doubt he would not have had his car into bond on his first trip. A week or two ago he returned to Winnipeg by motor informing the customs officials that he contemplated opening an office in Winnipeg and going into business. In view of the fact that he had just come from the United States to get his family, he was informed that since he was entering Canada on business he would have to pay duty on his car or put it into bond which would cost him \$100, so he decided to put the car into bond, which meant that he could not have the use of it while in Canada. He was allowed to bring the car from England to Canada, but he could not import it to Canada. The visitor had to set out to locate an office and a warehouse, to look up a house for his family, to have signs painted and painting done, to get a telephone and so on, and so essential to the opening of a place of business. These steps he had to take on foot or on the street cars. Just when he needed his car most to get around the city, it was taken into bond.

When in coming to Winnipeg to rent an office, for which he would pay rent, to have work done by Winnipeg workmen, to rent or buy a house in Winnipeg, to hire a garage, either as an employee or a general, and something to the development of Winnipeg, and all the encouragement he gets from the Customs Department is in the way of being charged \$10 to put his car in a place where he could not have the use of it.

OLD AGE
PENSIONS SHOULD
BE ENDORSED

The old age pension deserves opposition from some types of political representatives, and for what reason it is rather difficult to arrive at any conclusion.

The most enthusiastic opponent will admit that no one who has been

Something for Nothing

"Something for nothing" runs an old saying, "is worth all it costs". And this, we are afraid, is what usually happens when some member of the family is made administrator of the estate, with the idea that the administrator will serve for nothing.

We solicit your interviews and correspondence on this vital subject.

print in the diaries, their favorite bibles, or their church

The nightmare of want in late life is one of the greatest causes of unrest among the wage earning citizens, creating conditions from which very serious trouble to business through strikes have their origin.

The recent sale of the Alberta Government railways to the Canadian Pacific should make it comparatively easy for the British to get the pension into effect at the earliest possible moment.

John C. Buckley, M.L.A., and a few others would endeavor to get it going, it will soon be in force. What a calling down the Premier would get if Garland, the Standard is not in touch with

Mr. Buckley's views in the matter, but hopes that it will be one of the aggressive ones who will urge for early adoption of the pension act in Alberta.

LARGEST AND FINEST OIL TANKERS
SAIL UNDER CANADIAN ENSIGN

ABOVE—The "C. O. Silliman" world's largest Tanker. BELOW—The "Calgary" is most modern of Tank ships.

With the launching in England on September 14th of the motor ship "C. O. Silliman" the Canadian interest which already owns and operates the world's largest tank ship, has added another to its fleet and efficient of tankers, and a Canadian tanker fleet wins further command of the major oil fields of the world.

The "Calgary" slipped from the ways at the shipyards of the Canadian Shipbuilding Corporation, with Miss Eleanor Ross, daughter of Victor Ross, Vice-President of Imperial Oil, as the sponsor. The "Calgary" is a 15,600-ton vessel with an indicated horsepower of 1,200, and is one of the most powerful and fastest tankers of her size. She has a speed of 12 knots. She is 540 feet long with a 70-foot beam and a moulded depth of 28 feet. Her modern equipment will permit loading and unloading in 12 hours, and she is twenty-four hours, and so she will be almost continuously in transit across the oceans. The ship is owned by the Canadian Oil Company, a subsidiary of the Talors in Peru, Cartagena in Colombia, and Montreal and Halifax, and is to be used for economic transport of petroleum.

The "Calgary" is the last of three large modern sea-going tankers and one lake tanker which will have a total capacity of 45,000 barrels in the oil shipping for Imperial Oil. Presently her in the "Winnipeg" for lake service, the "Winnipeg" for lake service, the "Victorite" and "Montrealite" and "Calgary" are the flagships of the fleet, which will serve as the world's

largest tanker, the "C. O. Silliman". The three sea-going ships have a total capacity of 45,000 barrels of petroleum at maximum speed and with minimum consumption of fuel and manpower. A few years ago three days was considered a record for a tank ship. Today, with modern pumping equipment, a tank ship turns around in 12 hours, and can make 12 knots. She is 540 feet long with a 70-foot beam and a moulded depth of 28 feet. Her modern equipment will permit loading and unloading in 12 hours, and so she is twenty-four hours, and so she will be almost continuously in transit across the oceans. The ship is owned by the Canadian Oil Company, a subsidiary of the Talors in Peru, Cartagena in Colombia, and Montreal and Halifax, and is to be used for economic transport of petroleum.

The Imperial Oil fleet now comprises nine large ocean-going tank ships and one large lake tanker which are to be used for the oil products from the Magdalena River in Colombia, and which will serve as the world's

ENGLISH WOMEN
MUCH INTERESTED IN
WOMEN'S INSTITUTE

—

By Zon Palmer (Trotter)

English women dress better and

cooker better since the war than ever

they did before, due in large measure

to Canadian influence, declare my

hostess, a leader in club activities,

over the country, and in Oxford

University. "There are learning to

make salads and to use fresh

meats as your people do, and they are

studying the methods of Canadian

women."

Trotter, however, is

in the activities of Canadian rural

women, particularly the Women's

Institute and United Farm Women's

Institute. The Women's Institute is

extremely popular and important in

rural Canada, there are no urban

organizations are allowed.

It has filled a great need in pro

viding a centre of social interest and a

means of self-education along com

mon lines for the great numbers of

people in rural Canada.

Cooking, particularly, appeals to the

imagination of these Institute mem

bers who confront their Canadian

mothers with enormous salads com

posed of fresh vegetables, soups

and stews at every meal.

The idea of fresh fruit for breakfast

still is new, but one which is proving very popular.

Fruits in common use in Can

ada are apples, oranges, peaches

and pears, and many are very popu

lar, but they are making greater use

in England of small fruits and berries

culture of which has increased exten

sively in the last few years.

In a country such as England, where

farming is a profitable almost

every month of the year, home can

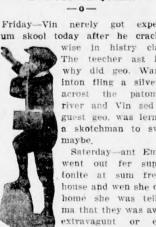

ning and preserving have not hereto
